Build a Knowledge Graph with Stardog
No coding required!

Description

Want to learn how to build a knowledge graph without prior experience or without knowing code? This hands-on training will start by teaching students' knowledge graph fundamentals. They will then learn how to build and publish a knowledge graph and create inference rules using Stardog. The training will be broken up into 2 virtual sessions.

Objectives

After completing this training, students will be able to:

- Describe a knowledge graph
- Specify use cases
- Build a data model
- Map and publish data for a knowledge graph
- View, search and explore the knowledge graph
- Build and apply inference rules
- Query the knowledge graph
- Share insights

When
Dec 12, 10:00 - 12:00 p.m. ET
Dec 13, 10:00 - 12:00 p.m. ET

Tools & Materials
- A computer with internet access
- Stardog Designer & Explorer

Audience
New Stardog users that are consumers, modelers or builders of knowledge graphs

Pre-requisites
Students should create a Stardog Free Cloud account: https://www.stardog.com/stardog-cloud/

Delivery Method
Virtual Instructor-led

Fees & Terms
- Free
